## DETAILED ACTION

### *Drawings*

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "carriage circuit board" and the "carriage is **opposed** to the recording head" as recited in claim 1 must be shown or the features canceled from the claim. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 2, 4-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled

in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. A **carriage circuit board** having a connector, said carriage circuit board being attached to a wall surface, and said carriage is **opposed** to the recording head were not in the original disclosure. Please note that the board that carries the connector was not originally disclose as a circuit board. The original specification disclosed that the **connector** is being installed on the carriage for electrically **connecting the recording head mounted on the carriage with a control circuit** (see [0012]; see [0004] for suggestion that control circuit same as circuit board). The disclosure only suggests that the connector is connecting to the control circuit/circuit board on the apparatus main body. It does not disclose that the connector is part of the circuit board, and therefore, the circuit board is having the connector as recited in the amended claim. In addition, it is noted that the original specification discloses recording head being installed **within** the carriage. It does not disclose the recording being **opposed** to the carriage as recited in the amended claim.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
